

Product Announcement

100770 Kit, Side Mount for BoatPort and MAX2i, GALV
100770SS Kit, Side Mount for BoatPort and MAX2i, SS

Implementation Date: November 2013

100770 & 100770SS

Features and Benefits

Introducing EZ Dock's new Side Mount Kit for the *EZ BoatPort* and the *EZ Port MAX2i*. The side mounted anchoring component is designed for the rear most molded in coupler pocket present in the EZ BoatPort, EZ BoatPort Side Extensions, and Port MAX2i. The front mounting plate is similar to that of the 100750 kit while the rear slide bracket allows for full articulating motion of the port due to the porting/launching as well as wave action. Caution must be taken when installing to ensure that the EZ Dock product being anchored is not loaded prior to installation of the Side Mount Kit to ensure that the vessel sits level when ported.

100770 & 100770SS

Shipping weight: 28lbs (12.7kg)

Dimensions: 8" X 6" X 20" (20.32cm x 15.24cm x 50.8cm)
